TO [REDACTED]

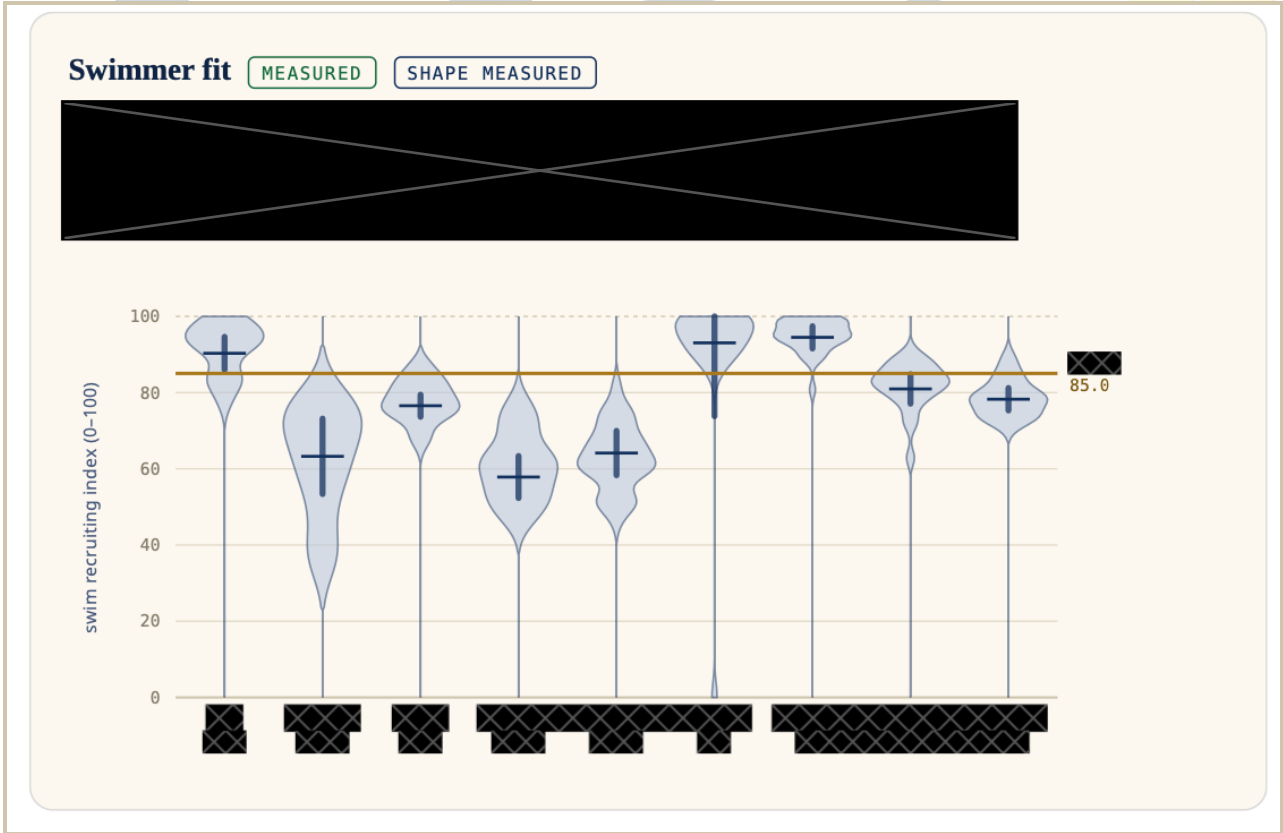

SECTION 01

Athletic Reading

- Three questions, read off the charts below:
- Current competitive level and projected development.
 - Conference-level recruiting position and roster fit.
 - Primary strengths, secondary-event value, and key gaps to close.

Overall Swimmer Fit Compared to Current College Rosters

Considering Top 3 Events

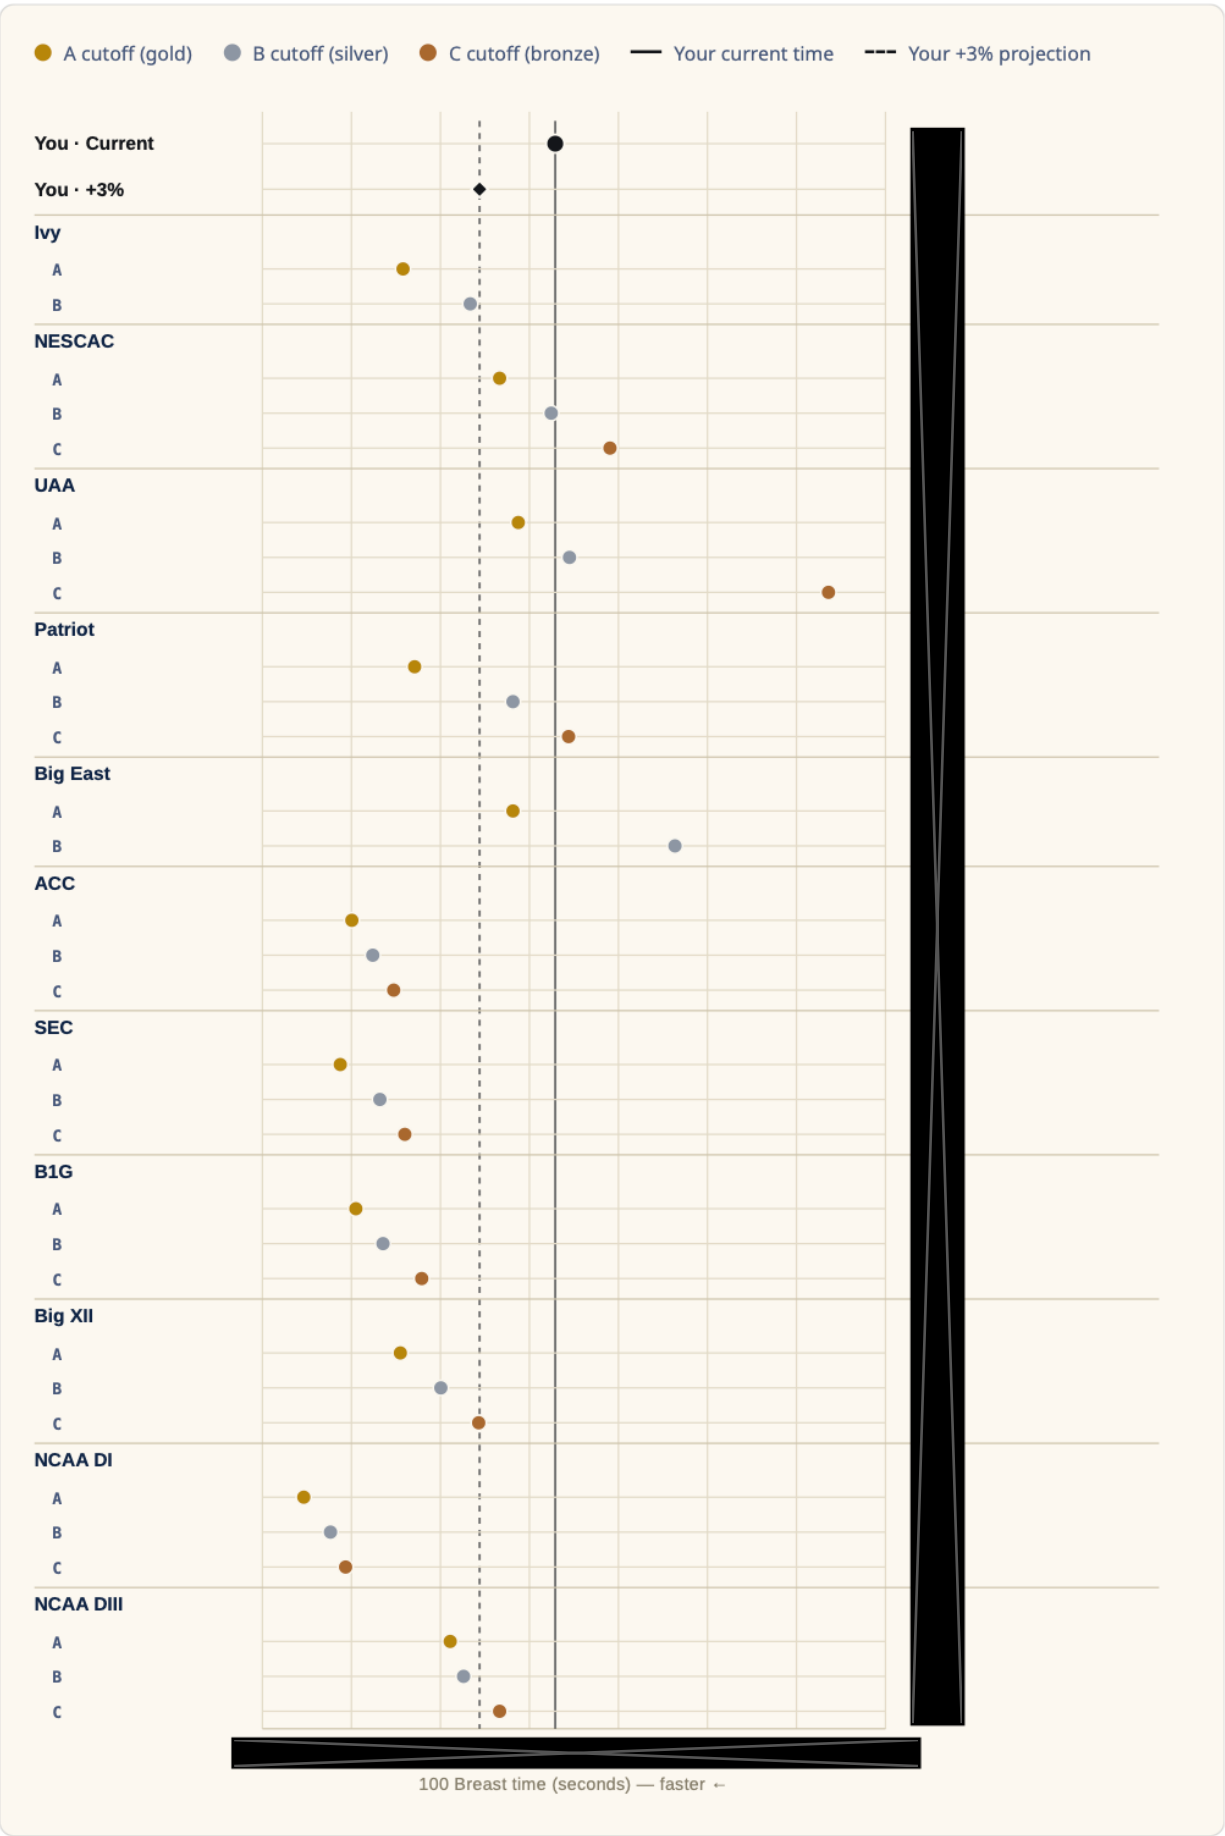

READING

An **85.0 Swimmer Index** places you firmly within the recruiting range of [REDACTED] programs shown, indicating a strong overall fit with additional room for development. [REDACTED] top three events, his projected performances suggest **strong scoring potential at the [REDACTED] Championships**, giving him value across multiple events rather than in a single specialty. At the [REDACTED] level, those same performances project as **difference-making championship scoring**, positioning him to contribute [REDACTED] to a team's conference performance.

100 Breaststroke

Current 1:28.8 · +3% 1:27.2

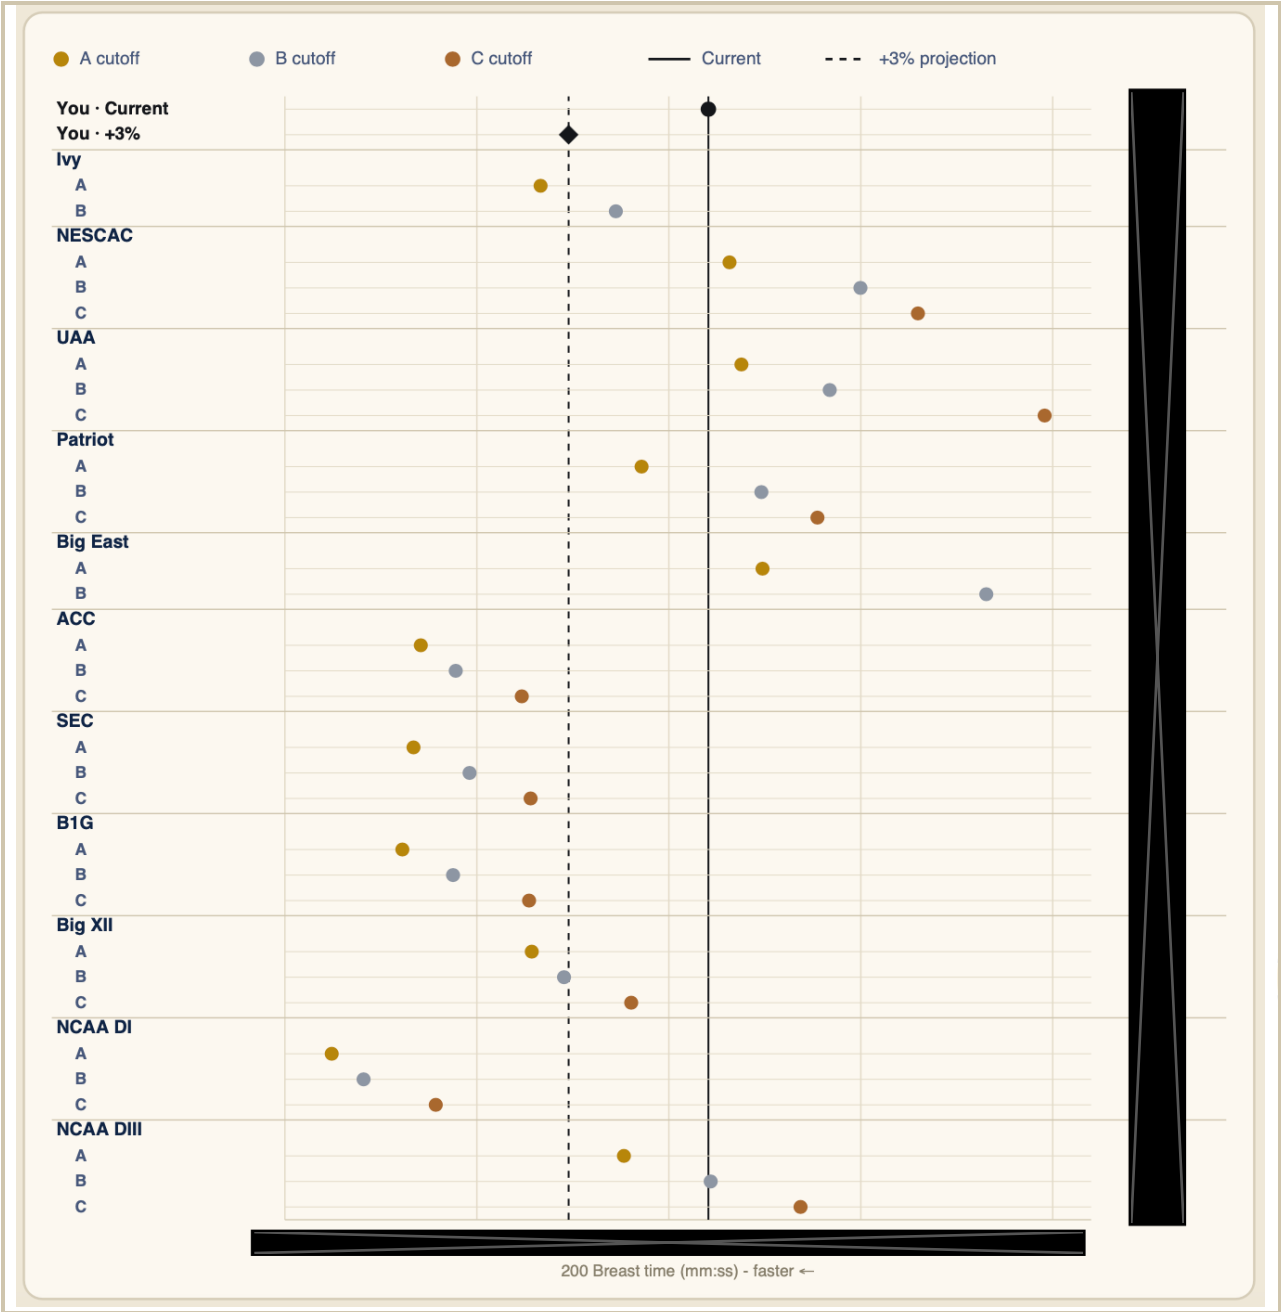

READING

At 1:28.8, the 100 is currently the tightest of the three events relative to championship-scoring cutoffs. Trace the solid gold line: today it sits just outside the 1:28.8 scoring band, and the +3% projection at 1:27.2 pulls it to the edge of that band and well into recruitable range for the target 1:26.5.

This is a realistic one-season move for a swimmer with room still to gain on 1:26.5 and back-half tempo. Treat the 100 as the event most responsive to focused work between now and 1:26.5.

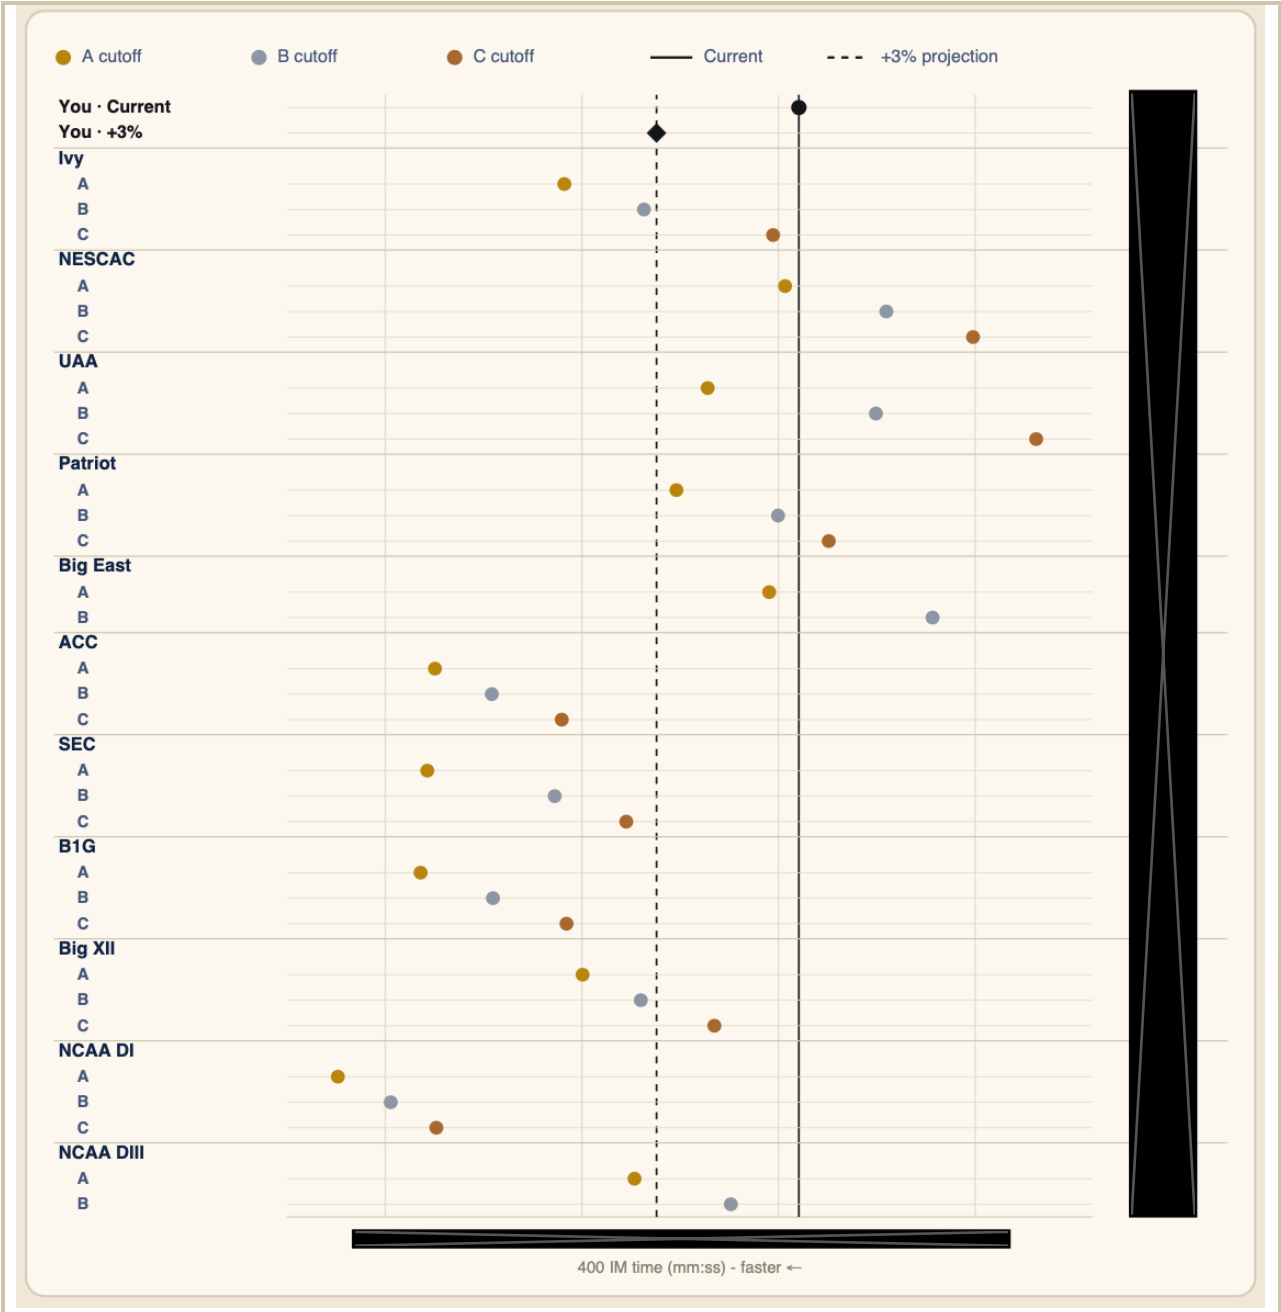

200 Breaststroke

Current [redacted] · +3% [redacted]

READING

The 200 is the stronger breaststroke relative to cutoffs and is the event that most clearly signals [redacted] value. The projected [redacted] clears meaningfully more of the [redacted] field than the 100 does, which matters because coaches recruit the 200 breaststroke as a distinct lineup slot, [redacted]. Lead the recruiting pitch with this event and [redacted].

READING

The 400 IM is the versatility card. A projected gives a coach a second scoring event across four strokes, which reads as lineup flexibility and trainability rather than single-event specialization. For a mid-distance breaststroker, a competitive IM is

BENCHMARK INTERPRETATION · ATHLETIC

Where this profile sits

Read together, the three charts describe . The 200 breaststroke is the lead event and the clearest source of value; the 400 IM supplies the second scoring event and the versatility coach’s prize; the 100 is the developing sprint, closest to its cutoffs and the most responsive to a single season of targeted work.

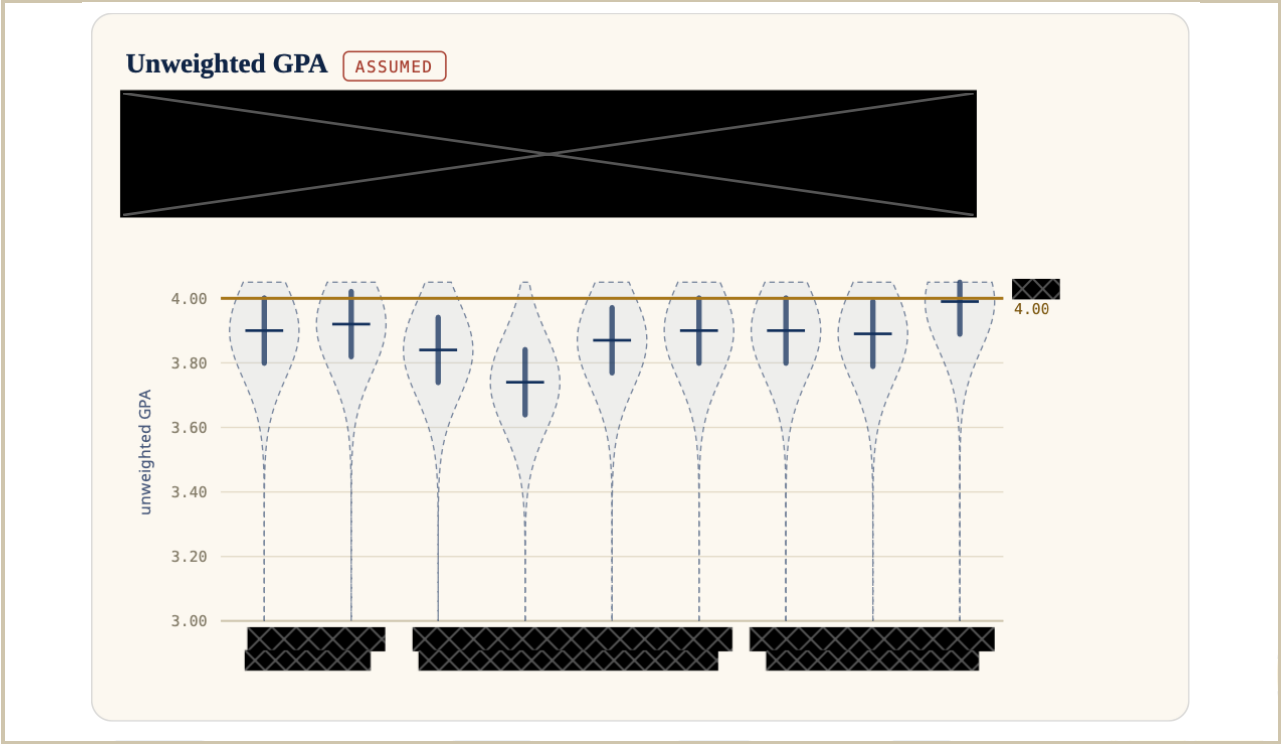

The consistent **3% projection line** is the story to tell coaches: it is not a wish, it is a standard year-over-year improvement rate, and at that rate every event moves from . The gap to close is , both trainable before the

Academic Reading

The academic profile against the target conferences and school list:

- Academic strength relative to the athlete's target conferences and school list.
- Course rigor, standardized testing, and GPA trajectory.
- Potential admissions strengths, constraints, and areas to improve.

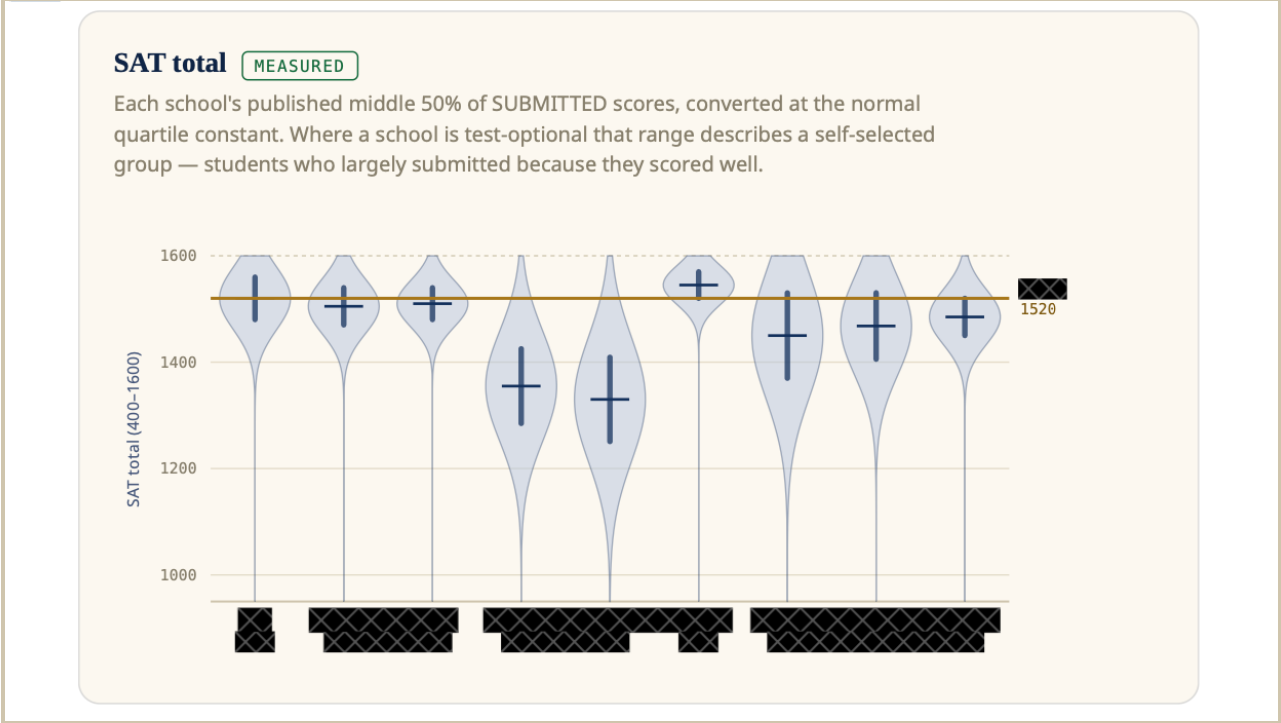

Unweighted GPA You · 4.00

READING

A **4.00 unweighted GPA** sits at or above the admitted middle-50% at every school on the list. Unweighted GPA compresses hard at the top, so this is effectively a ceiling result and takes GPA off the table as a concern. What it does not capture, course rigor and school context, is carried by the Academic Index instead.

SAT total You · 1520

READING

At **1520**, the SAT lands inside admitted middle 50% and above the midpoint at the rest of the list. It is a clearing score for every requested read. A retake aimed at the median would add margin, but it is optional rather than necessary, useful only if the rest of leaves room for it without pulling focus from the pool.

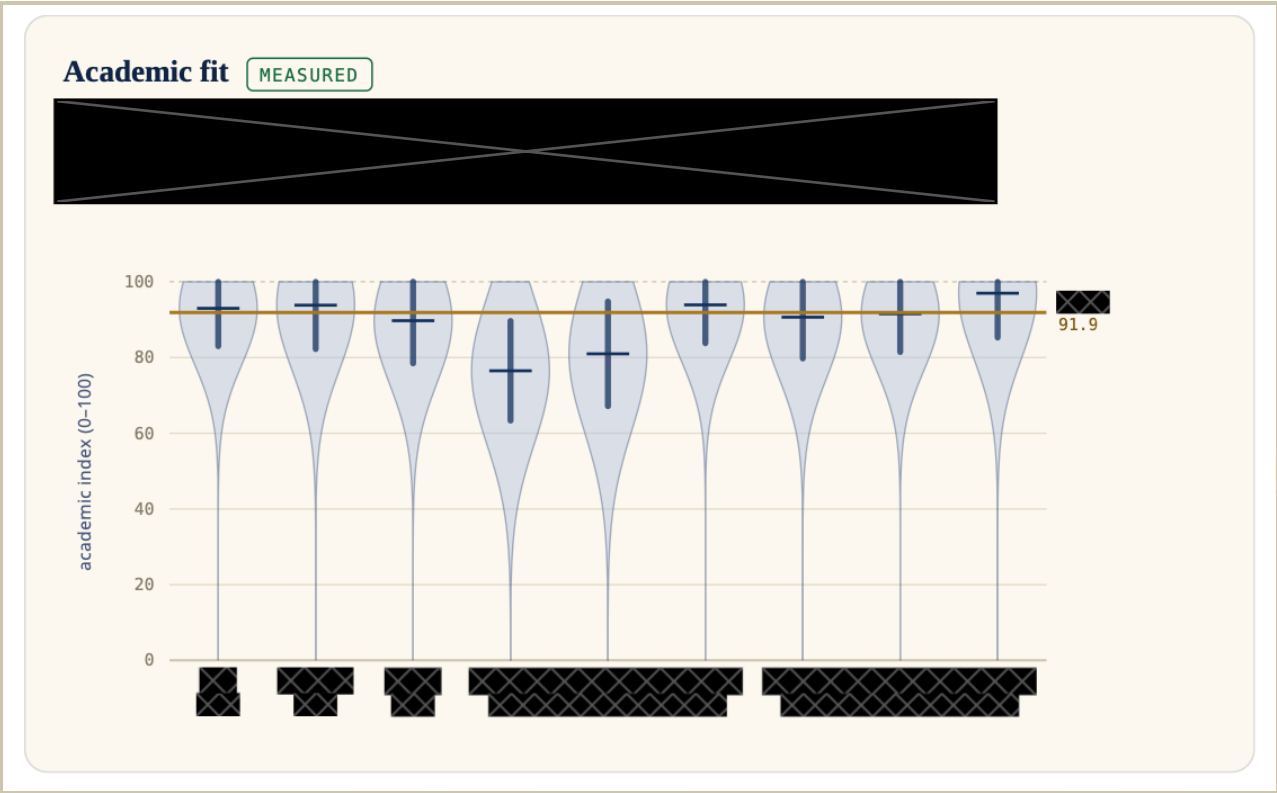

The academic read

An **Academic Index** of █ sits █, and the underlying numbers back it up: a 4.00 GPA at the ceiling and a 1520 SAT inside the █ band. Academically, this is a green-light profile for the full requested-reads list.

The practical consequence is █. A high AI gives a coach more room to spend on a pre-read and a likely letter, which means the academic side can be used to █. The only optional lever is █; everything else is already where it needs to be.

Academic Fit Compared to Current College Student Body

Excluding Student's Athletic Profile and Legacy Status

91.9 Academic Index places him firmly within the academic range of █ programs shown, indicating a strong overall fit across █ list. His academic profile compares favorably with █ current student body, meaning academics should be a **strength in the recruiting process rather than a limiting factor**. Combined with his athletic profile, this gives coaches greater confidence █ and continued recruiting interest.

Combined Reading — Target School List

Athletic fit and academic fit resolved into one list, sorted by how the two line up. Match % is SDA's blended read of roster need, event fit, and academic position.

Holistic Student Fit Across Colleges
Considering Athletic and Academic Profiles

How SDA Can Help — [REDACTED]

Specific to this profile and this timeline. Every item is something we start on now, with the [REDACTED]

ATHLETIC

Close the gap and time the window

The athletic read is clear about where the work is. We turn that into a dated plan against [REDACTED]

- **Event-drop plan.** Target the 100 from [REDACTED] toward the [REDACTED] projection, with the 200 breaststroke led as the primary recruitable event and the 400 IM positioned as versatility.
- **Coach-contact timeline.** Build the target-coach list, [REDACTED], and [REDACTED] the moment [REDACTED] opens on [REDACTED]
- **Relay framing.** Package the breaststroke as a medley-relay leg, which is often [REDACTED]
- **Network access.** Connect with [REDACTED] and [REDACTED] to hold the 3% trajectory the charts assume.

[REDACTED] / [REDACTED] / [REDACTED] → targeted season + coach timeline → recruitable across three events

ACADEMIC

Turn a strong profile into leverage

The numbers already clear the bar. The job is to make them work for the athletic pitch, [REDACTED]

- **Pre-read support.** Package AI [REDACTED], the 4.00 GPA, and the 1520 SAT into the one-page academic summary coaches use to run a pre-read.
- **Testing call.** Decide whether a single SAT retake toward the [REDACTED] median is worth it, or whether the score is already done. Our read is that it is optional.
- **Application read-overs.** Supplement and essay review for the [REDACTED] applications through our application network.
- **Rigor framing.** Present course load and GPA trajectory in the form a coach can [REDACTED]

AI [REDACTED] · [REDACTED] · [REDACTED] → pre-read packet + read-overs → academics backing the pitch

GUIDANCE

Navigate the process with people who have

The Ivy recruiting path has its own rules and its own tempo. We shorten the learning curve.

- **Ivy-specific guidance.** How likely letters work at [REDACTED], what a support band means, and how the timeline actually runs. [REDACTED] offe [REDACTED], so the mechanics differ from [REDACTED]
- **Questionnaire to visit.** A step-by-step path from the recruiting questionnaire through unofficial and official visits, including [REDACTED]
- **Mentor match.** Direct connections to swimmers who have navigated recruiting at highly selective programs and can tell you what the charts cannot.

you are here → SDA guidance + connections → an informed, well-timed commitment

This assessment evaluates recruiting viability from current data and SDA benchmarking. It is not a prediction or guarantee of admission, offers, roster spots, or scholarships. Times, GPA, and test scores are self-reported; conference cutoffs are meet-qualifying standards, not recruiting or admissions guarantees. Academic Index and conference-band figures are estimates based on information provided, and a coach pre-read is the only authoritative academic read. Signing Day Advisors is not affiliated with any college, university, the Ivy League, or the NCAA.
